

Hot or Cold Therapy Wrap

The **Rocket Wrap™** is a flexible and conformable sport wrap that provides versatile hot or cold therapy before, during, and after workouts and athletic activities. This premium universal wrap is constructed of latex-free neoprene, which acts as an insulator for the Versa-Pac® reusable hot or cold gel pack included.

A built-in stretchable pouch holds the gel pack while protecting the skin from excessive heat or cold. Easy to attach straps with velcro tabs hold the wrap and pack firmly in place, eliminating the need for hooks or pins. The **Rocket Wrap™** is a universal product that can be used on any part of the body! It provides compression and freedom of movement.
